

35 E. 7th Street, Suite 405  
Cincinnati, Ohio 45202

**Position: TECHNOLOGY ASSOCIATE**

**4iNNO Background**

Entrepreneurship at 4iNNO is a state-of-being. We work on the edge, in the most challenging of situations with some of the most sophisticated companies in the world. We buck the large company trend of linear product development, instead adopting the scientific method to increase innovation probability of success. Our hypothesis-driven and experimentation-based approach obsesses over getting the right synthesis between consumer needs, scientific solutions, and business model approaches in iterative and efficient ways.

This is a unique opportunity for passionate, hardworking and brilliant people to join a team that thinks big, practices lean and open innovation, and is driven to solve the biggest industry challenges.

**As part of our team, you will:**

- Work closely with the Directors and other Associates to build and deliver high quality portfolios of innovative technologies and solutions to our clients
- Be responsible for researching, interpreting and reporting the science underlying client innovation problems
- Perform landscaping of technologies, patents, products and partners to identify and deliver valuable client solutions through Open Innovation
- Provide clear, concise opinions and alternatives for technologies and evaluate ideas and solutions
- Interact with industry thought leaders such as scientists, physicians, management executives and others
- Work with and manage massive amounts of information and knowledge
- Communicate, collaborate and innovate to deliver more value to our clients

**Desired Knowledge / Education / Skills:**

- Advanced science degree (MS/PhD) in Engineering or Science (Materials / Chemical / Mechanical / Computer Science / Physics)
- Strong technical and scientific knowledge discovery, analysis and inference abilities, with experience in data science or analytics desired
- Industry / start-up / business experience is a plus
- Entrepreneurial, self-reliant, self-motivated, self-disciplined, creative and determined to reach goals and objectives
- Must be passionate, creative and driven to solve complex problems using science and technology
- Ability to combine ideas and people in creative and new ways and communicate to many directions

- Enthusiastic about new ideas and technologies and how they could be applied to emerging business opportunities
- Excellent verbal, written and presentation skills
- Willingness to travel to client locations
